

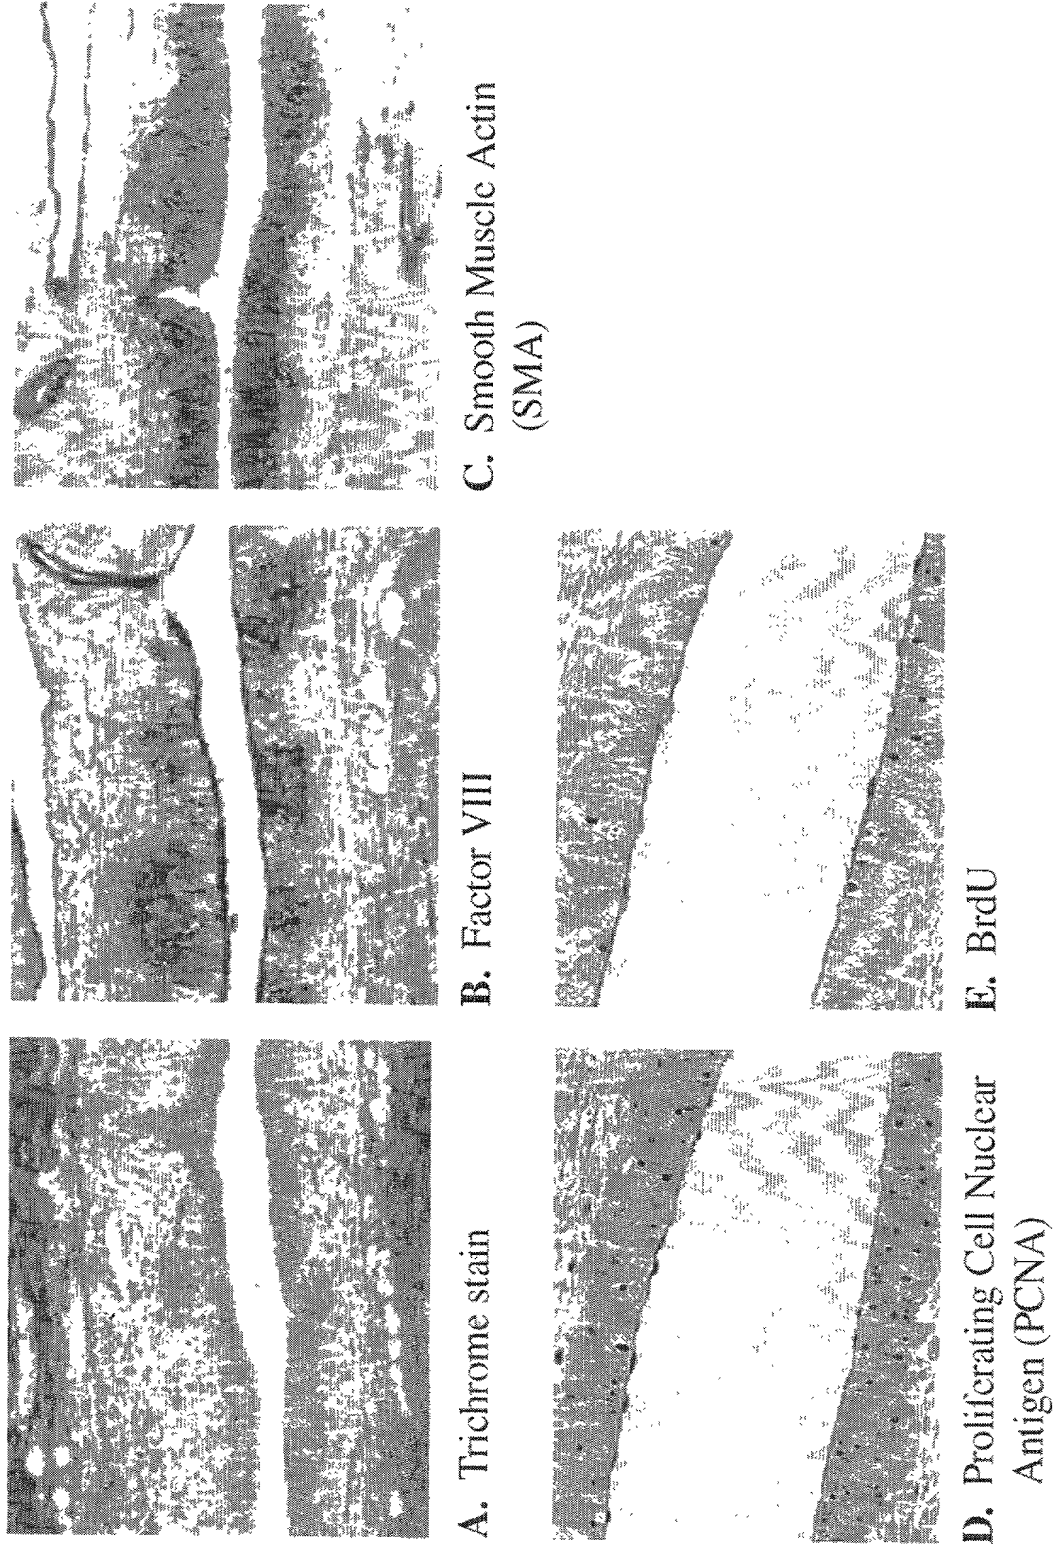

FIG. 1a-e: Histological sections of blood vessels formed in canine myocardium 2 weeks following injection of BDAP in 70% povidone

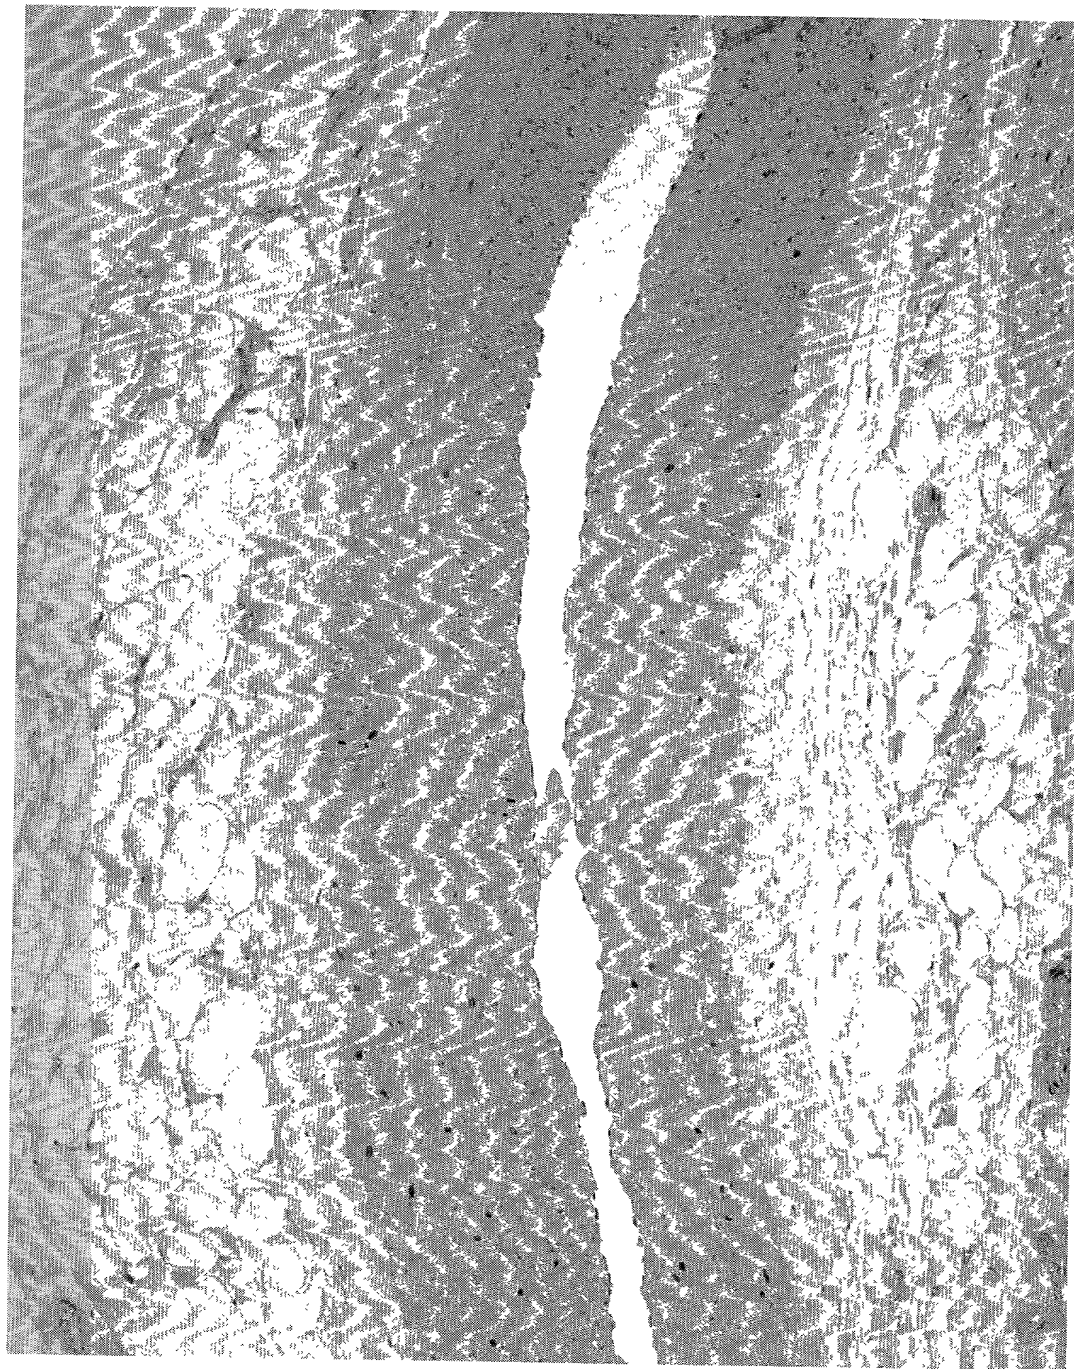

FIG. 2: 109-6-5M: Immunostaining of Smooth muscle cells and BrdU positive cells in sections of ischemic myocardium treated with GDF-5 solubilized in 1% povodone.

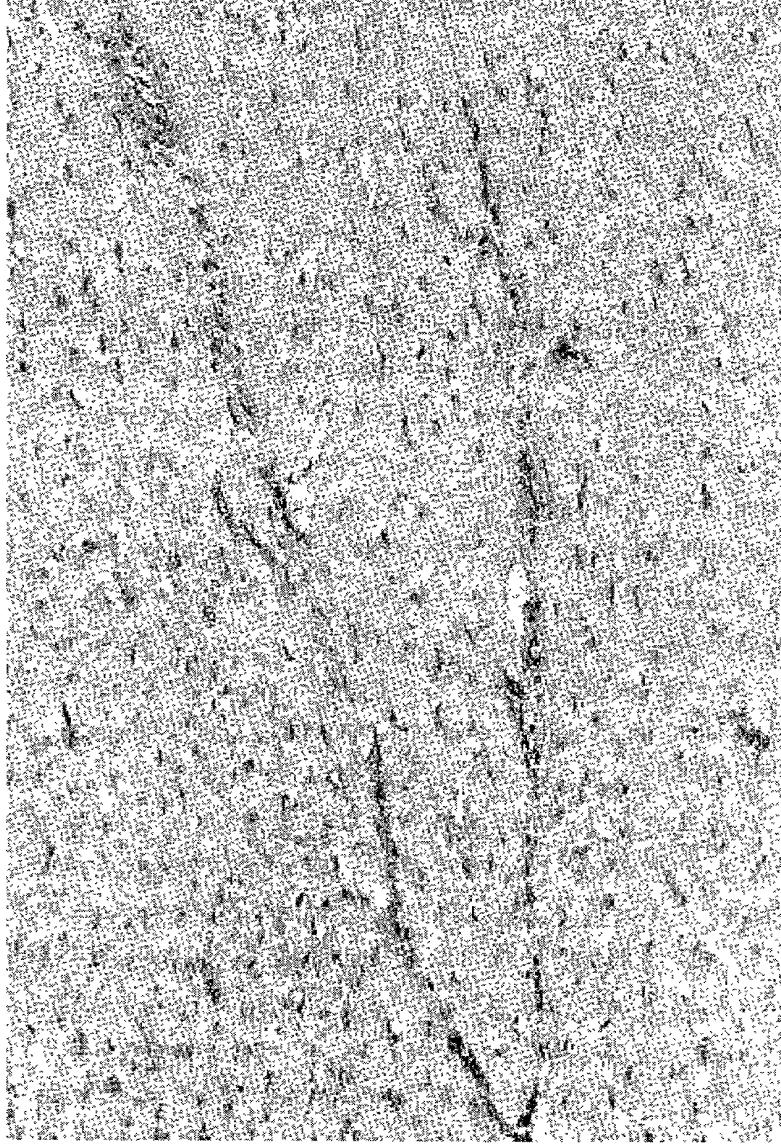

FIG. 3: TMR-GFM: Factor VIII immunostaining of a section of porcine myocardium that received GFM solubilized in 5% povidone.
